Instant EFT only supports the banks shown above. If you don't have a supp

After a successful transaction, the following services are initiated:

1. The traveler is issued with a boarding ticket + reservation code, all relevant information for the particular route will be stipulated on the ticket. This electronically generated PDF invoice is sent directly to the travelers email.
2. The First and Last name of the traveler, mobile phone number and reservations code is added to the route information on the mobile phone of the particular driver allocated to this route. The payment status will also be clearly stated. [Paid or Outstanding]
3. On the administration pages in head office this traveler's full information is added as line entry under the allocated route date and time.

This will be considered a successful transaction.

Driver information and mobile information center:

Each driver has to be registered on the system to be able to receive their electronic route information. The data for each route plus the information on each partaking traveler will be sent to the drivers mobile phone in real-time.

1. The routes that the driver is registered for that particular day.
2. By clicking on the route name for the day the driver will be able to see how many travelers are already reserved for the route plus their names, mobile numbers and reservation codes. There will also be a clear indication that the ticket was paid or not.

Back office administration:

The routes will be pre-loaded by Listit. Thereafter as reservations are made the system will automatically allocate travelers to their destinations/routes.

As soon as a route+date is fully booked it will be removed from the system, no longer reservable.

- When a telephonic reservation is received at the head office. Telephone operator will be able to add a traveler to a selected route, with the option of:
Taking down their detail and entering their credit card for payment.
Alternately indicating that the traveler will pay cash and informing the driver to collection.

Any traveler that accidentally chose the wrong route or has to be re-located to another travel date can be moved around in the administration pages.
